

ODMD Observation

Lab 1 College Information System

Problem Statement

It is a system that maintains student staff and department information. It maintains the course taught by teachers and students enrolled in them. Admissions records of student and examination details and other important information related to college management is maintained.

SRS

College Information System has admin who manages the staff, student & department.

Admin can view & modify the student's records like student's profile, attendance, fee, results, details of teacher & other employees in college, their personal information & their attendance for their salaries.

In this system, user authentication will be done by login by username & password and classified by user type.

Staff in college teach more than one course to many students and the staff are teachers conduct examination for students of the college.

The students of the college register themselves in the dept and for the courses they are interested in at your college by taking admission & following all the admission procedures.

There are different types of examination conducted by the college for the students. Intervals & semester end exams are two of them.

Every course has a name & its unique name. Every course has different subjects & each subject has a unique name.

Dept will provide the details about the departments within a college with their name & every dept has its own name.
